## **Management Commentary**

President and CEO, Sam Sato commented, "The customer response to our updated brand positioning has been strong and led to a Q3 increase in net sales of 1.3%. That said, we are seeing the impacts of the inflationary environment on our core consumers which we believe will continue through Q4 and into next year. In Q3 we took appropriate actions aligned with the shift in consumer behavior resulting in contraction in our selling gross margins. Reflecting a softer consumer backdrop, we are updating our full year guidance. Importantly, our brand continues to strongly resonate with consumers and our inventories, below levels from two years ago, are in a healthy position to support peak holiday shopping."

Sato concluded, "During the third quarter, we continued the introduction of our AKHG outdoor recreational assortment for Women with great success in new Fall and Winter seasonal items. Our Women's business overall increased 10% and represented 32% of total third quarter company sales. We are excited to have reconfigured 20 stores with an expansion of our Women's footprint and the investments we've made in product innovation and great brand marketing to build our Women's collections are paying off by cementing Duluth Trading Co. as a balanced, co-gender lifestyle brand that leverages our customer shopper profile where female shoppers make up 50% of the purchases. We remain committed to the strategic pillars of our Big Dam Blueprint leading with a digital-first mindset, while we future proof our business through key infrastructure investments. We are in a strong financial position and our Duluth brand and sub-brands continue to broadly resonate with consumers."

# Operating Results for the Third Quarter Ended October 30, 2022

Net sales increased 1.3% to \$147.1 million, compared to \$145.3 million in the same period a year ago. Direct-to-consumer net sales increased by 6.8% to \$91.0 million due to growth in website visits, coupled with increased promotional activity during the current quarter. Retail store net sales decreased by 6.6% to \$56.1 million due to continued slower store traffic, which was partially offset by continued strong conversion rates.

Gross profit decreased to \$76.9 million, or 52.3% of net sales, compared to \$83.7 million, or 57.6% of net sales, in the corresponding prior year period. The decrease in gross profit margin was primarily driven by increased promotional activity during the current period.

Selling, general and administrative expenses increased 7.0% to \$84.3 million, compared to \$78.8 million in the same period a year ago. As a percentage of net sales, selling, general and administrative expenses increased to 57.3%, compared to 54.2% in the corresponding prior year period.

The increase in selling, general and administrative expense was primarily due to increased digital advertising to drive brand awareness and store

traffic, as well as increased depreciation from continued capital investments.

The effective tax rate related to controlling interest was 25% in both the current and prior year periods.

#### **Balance Sheet and Liquidity**

The Company ended the quarter with a cash balance of \$9.4 million, an inventory balance of \$204.7 million, net working capital of \$98.7 million, and \$10.0 million outstanding on the Duluth Trading revolving line of credit.

#### **Non-GAAP Measurements**

Management believes that non-GAAP financial measures may be useful in certain instances to provide additional meaningful comparisons between current results and results in prior operating periods. Within this release, including the tables attached hereto, reference is made to adjusted earnings before interest, taxes, depreciation and amortization (EBITDA). See attached Table "Reconciliation of Net Income (Loss) to EBITDA and EBITDA to Adjusted EBITDA," for a reconciliation of net income (loss) to EBITDA and EBITDA to Adjusted EBITDA for the three and nine months ended October 30, 2022, versus the three and nine months ended October 31, 2021.

Adjusted EBITDA is a metric used by management and frequently used by the financial community, which provides insight into an organization's operating trends and facilitates comparisons between peer companies, since interest, taxes, depreciation and amortization can differ greatly between organizations as a result of differing capital structures and tax strategies. Adjusted EBITDA excludes certain items that are unusual in nature or not comparable from period to period.

The Company provides this information to investors to assist in comparisons of past, present and future operating results and to assist in highlighting the results of on-going operations. While the Company's management believes that non-GAAP measurements are useful supplemental information, such adjusted results are not intended to replace the Company's GAAP financial results and should be read in conjunction with those GAAP results.
